

## About Us

Founded by Roy Martin Shotton (17 June 1944 to 22 October 1999), P&R Sheetmetal was established in 1977. With 9 staff members we quickly grew a reputation for Precision and Quality. In 1996 P&R invested in their first Laser cutting machine, which led the company into a new phase of high turn over, precision products. P&R became a Quality Endorsed company in 2001.

While still a family owned company, we now employ more than 85 staff members and are one of the leading sheetmetal companies in the country today.

Our business divisions include:

- ParMED - formerly known as Hendicare Mortuary Equipment
- P&R Sheetmetal - Leading supplier of sheetmetal to industries including Bio-Medical machinery, Point of Sales and Logistics
- Shotton Lifts - Manufacturer of cost effective customer oriented vertical transport solutions to the diverse market including Passenger, Disabled, Residential, Commercial and Industrial Market
